

Rechargeable Battery Assortment

This assortment features different chemistries and voltage ratings suitable for a wide range of electronic devices and power tools. Cell types include Ni-Cd, Ni-MH, and Li-ion, with varying capacities and discharge rates.

Product Overview

Comprehensive Battery Solutions

This rechargeable battery assortment offers a versatile range of power solutions, including various cylindrical cell sizes and pre-assembled battery packs complete with wiring and connectors. Engineered for flexibility, the collection supports multiple chemistries and voltage requirements, making it ideal for diverse electronic devices and power tool applications. With a focus on performance, these cells are designed to handle varying capacities and discharge rates to meet professional operational needs.

Technical Specifications

Form Factors

- Cylindrical cells
- Battery packs with wiring
- Connector-integrated packs

Performance Metrics

3 count

Chemistry Types

Supported Chemistries

Ni-Cd, Ni-MH, Li-ion
