

Rechargeable LED Emergency Light with Fan

This portable rechargeable LED emergency light combines illumination with a cooling fan. The device features a bright LED lamp for emergency lighting and a built-in fan for personal cooling.

Product Overview

Versatile Emergency Solution

The TK-900F is a portable, multi-functional emergency device that combines bright lighting with a cooling fan. Engineered for reliability, it features an automatic light-up function during power outages, making it an essential tool for safety. Its design includes an integrated handle and a multi-angle table lamp configuration to suit various environmental needs.
