

Rechargeable LED Spotlight and Fluorescent Lantern

This rechargeable lantern provides both focused and ambient lighting options. It features durable plastic housing, a built-in rechargeable battery, and an integrated handle for portability, making it suitable for camping, emergencies, and general use.

Product Overview

Versatile Dual-Mode Lighting

The Rechargeable Portable Lantern 922 provides a flexible lighting solution combining a focused beam spotlight with a broad-area fluorescent lantern. Encased in high-impact plastic, this unit is engineered for durability during outdoor adventures or emergency power outages. Its integrated rechargeable battery system removes the need for frequent battery replacements, ensuring sustainable and reliable performance.
