

Rechargeable Portable Cooling Fan

This rechargeable cooling fan provides personal cooling in a portable design. It features a multi-blade fan enclosed in a circular protective grill and is mounted on a sturdy base.

Overview

Portable Cooling Solution

This rechargeable cooling fan is designed for versatile personal use in homes, offices, and indoor environments. Featuring a multi-blade design enclosed in a protective circular grill, it provides reliable airflow while maintaining safety. Its built-in rechargeable battery allows for convenient cordless operation, making it an ideal solution for areas without immediate access to power outlets.

Technical Specifications

Power Source	Rechargeable Battery
Operation Mode	Cordless

Design & Build

Fan Design	Multi-blade with circular protective grill
Mounting Style	Sturdy base with vertical support

Usage

Key Benefits

- Portable and cordless design
- Rechargeable for use without power outlets
- Compact and streamlined build

Suitable Environments	Home, Office, Indoor Spaces
