

Recordable Audio Module with Microphone

This recordable audio module features a microphone, speaker, and control board for recording and playing back audio. It is suitable for integration into greeting cards, toys, and promotional items.

Product Overview

Versatile Audio Recording Solution

This recordable audio module is a compact, push-button activated sound system designed for seamless integration into greeting cards, promotional items, and toys. Featuring a high-quality 40mm speaker and a user-friendly recording interface, it allows for quick and reliable audio message delivery. The module comes ready-to-use with a built-in battery power supply and adhesive backing for easy mounting in your custom projects.
