

Rectangular Stacked Reflectors with Mounting Frame

These reflectors feature a series of vertically stacked rectangular red reflectors. Each reflector is encased in a durable black plastic frame with mounting holes for secure installation.

Product Overview

High-Visibility Safety Reflectors

These rectangular stacked reflectors are engineered to significantly enhance visibility in diverse environmental conditions. Featuring a robust black plastic mounting frame with integrated corner holes, they allow for secure and versatile installation. These units are highly effective for safety applications, vehicle marking, and industrial equipment requiring reliable reflective surfaces.

Technical Specifications

Reflector Color

Red

Design Configuration

Vertical stacked rectangular reflectors

Housing Material

Durable black plastic

Mounting Features

Pre-drilled mounting holes, Corner installation points

Applications

Primary Applications

- Safety and hazard signaling
- Vehicle marking
- Industrial equipment visibility
