

Reduced Shank Twist Drill Bit DIN338

This drill bit features a reduced shank, available in 10mm and 13mm sizes. It conforms to DIN 338 standards, allowing larger drill bit diameters to be used with smaller chuck sizes.

Product Overview

Reduced Shank Twist Drill Bit

These twist drill bits are manufactured to DIN 338 standards, designed to provide reliable performance in drilling applications. The primary feature is the reduced shank design, available in 10.0mm and 13.0mm sizes, which enables the use of larger diameter drill bits with smaller capacity chucks. This versatility makes them an essential tool for workshops needing to accommodate a wide range of hole sizes without requiring specialized heavy-duty equipment.

Technical Specifications

Standard	DIN 338
Available Shank Diameters	10.0mm, 13.0mm

Dimensional Data

Drill Bit Dimensions

Diameter (mm)	Flute Length (mm)	Overall Length (mm)
10	87	133
11	94	142
12	101	151
13	101	151
14	108	160
15	114	169
16	120	178
17	125	184
18	130	191
19	135	198
20	140	205
