

Reducer Pipe Fitting

This reducer pipe fitting connects pipes of different diameters. It is suitable for use in piping and ductwork systems.

Product Overview

High-Durability Industrial Pipe Reducer

This high-manganese steel reducer pipe fitting provides a reliable solution for connecting pipes of varying diameters in heavy-duty industrial and construction machinery. Engineered with high-chrome cast components, these reducers offer superior wear resistance and extended service life. The dual-construction design ensures optimal flow efficiency, helping to reduce maintenance costs and improve long-term operational performance.

Technical Specifications

Size and Compatibility

125 mm
Min Diameter

150 mm
Max Diameter

1200 mm
Length

Construction

- Single wall manganese steel
- Double wall high-chrome inner wall
- Two-section welding

Material Composition

High Manganese Steel (Mn13Cr2), High Chrome Cast
