

Refillable Brazing Blowtorch

This refillable blowtorch is designed for brazing and soldering applications. It delivers a high-temperature flame with a durable metal nozzle and a control valve for precise flame control.

Product Overview

Versatile Professional Brazing Solution

This refillable brazing blowtorch is engineered for professional tasks requiring precise, high-temperature heat application. Featuring a durable metallic construction, it is designed for demanding environments like soldering and brazing. The integrated handle and adjustable nozzle assembly allow for ergonomic handling and controlled flame management.

Technical Specifications

Applications

- Soldering
- Brazing
- High-temperature heating tasks

Tool Type	Refillable Brazing Blowtorch
Material Finish	Copper-colored metal
Key Features	Refillable, Adjustable Flame, Ergonomic Handle
