

# Refuse Collection Vehicle

This specialized vehicle is designed for efficient waste management and collection. It features a large-capacity waste container and a hydraulic lifting system.

## ADDITIONAL IMAGES

## Overview

### Professional Waste Collection Solution

This refuse collection vehicle is engineered for efficient municipal waste management and urban sanitation services. Featuring a robust chassis and a hydraulic lifting system, it ensures reliable loading and unloading of waste materials. The versatile design supports a wide range of operational requirements, making it an ideal choice for city waste collection and disposal services.

## Technical Specifications

### Loading Capacity Range

**1 T**

Minimum Capacity

**8 T**

Maximum Capacity

**Gross Vehicle Weight**

8275 kg

**Engine Type**

Diesel

## Features

### Key Operational Features

- Hydraulic lifting system for automated waste handling
- Robust chassis construction for durability
- High-capacity compactor body
- Safety reflectors and standard industrial tires
