

Reinforced Polyester Webbing Sling

This webbing sling is constructed from multiple layers of tightly woven polyester. It features reinforced eyes with wear pads for increased durability during heavy lifting.

Product Overview

Professional Lifting Solution

The HS series chain block is a portable, hand-operated lifting device engineered for efficiency and durability. Ideal for construction sites, warehouses, and remote locations without electricity, it offers superior load control and compact design. Its versatile construction ensures safety and ease of maintenance across various industrial lifting applications.

Key Features

Advantages

High Efficiency, Lightweight Design, Durable Construction, Compact Size, Easy Maintenance
