Product Overview

Smart Remote Controlled Power Management

This remote-controlled outlet switch set offers a flexible and energy-efficient solution for managing electrical devices from a distance. With self-learning programming, users can easily match transmitters to receivers to control lighting and appliances wirelessly. The system supports individual channel control and a master all-on/all-off function, operating over a range of up to 30 meters.

Technical Specifications

Control Range

30 M

Remote Distance

Power Rating

Parameter	Value
Voltage	120V~/60Hz
Max Load Power	1200W

Transmission Frequency	433.92 MHz
Transmitter Battery	DC 12V (23A) battery

Certifications

Compliance Standards	ETL, C-ETL, FCC
