

Remote Controlled Power Distribution Unit with Surge Protection

This power strip features individually remote-controlled outlets for convenient power management. It is equipped with surge protection to safeguard connected devices.

Product Overview

Remote Controlled Power Distribution

This advanced power distribution unit provides wireless, individual control over five separate outlets, allowing for efficient energy management and the reduction of standby power consumption. Designed for AV and PC equipment, the unit features built-in surge and overload protection to safeguard your sensitive electronics. With a robust 50-meter wireless range and an included remote, it offers a versatile solution for home and office power management.

Technical Specifications

Rated Voltage	230 V
Frequency	50 Hz
Maximum Load Power	2300 W
Transmission Frequency	433.92 MHz
Standby Power Consumption	< 0.6W

Connectivity & Control

Remote Range

50 m
Range

Controllable Outlets	5
----------------------	---
