

Remote Handle Controller for Machinery

This remote handle controller is designed for operating machinery. It features a durable plastic housing and clearly marked buttons for intuitive use.

Product Overview

Rugged Remote Control Solution

This remote handle controller is engineered for reliable machinery operation, particularly suited for hoist and winch systems. Featuring a durable plastic housing, it is designed to withstand demanding industrial environments while providing intuitive control. The unit comes pre-wired with a color-coded harness for straightforward, secure installation.

Technical Specifications

Control Type	Remote Handle Control
Number of Buttons	2
Housing Material	Durable Plastic
Primary Applications	Hoist Systems, Winch Systems, Remote Machinery Operation

Installation

Wiring Features

- Color-coded wiring
- Ring terminal terminations
- Ready for secure connection

Connection Method	Pre-wired harness with ring terminals
