

Remote Reading Water Meter

This telemetering water meter is designed for remote reading and monitoring of water consumption. It features both a mechanical display with dials and a digital counter for precise measurement.

Product Overview

Professional Remote Reading Water Meter

This telemetering water meter is designed for precise remote consumption monitoring in residential, commercial, and industrial environments. It combines a reliable mechanical dial display with an integrated digital counter to ensure accurate measurement and ease of reading. Built with robust, high-quality materials, the device maintains consistent performance under diverse operational conditions.

Technical Specifications

Compliance Standard	GB/T 778.1-1996
Maximum Operating Temperature	30 degC
Pressure Loss	LP < 0.1 MPa

Features

Suitable Applications

- Residential water management
- Commercial facility monitoring
- Industrial consumption tracking

Reading Capabilities	Remote Reading, Mechanical Display, Digital Counter
