

Residential Pressure Booster Pump

This pressure booster pump increases water pressure for residential or light commercial use. It is designed to supply water to multiple outlets or boost pressure for irrigation systems.

Product Overview

Professional Residential Pressure Solution

This residential pressure booster pump is engineered to provide consistent water flow across various domestic and light commercial applications. Equipped with an integrated pressure tank and gauge, it ensures reliable monitoring and stable performance. Designed for convenience, the unit features an automatic pressure switch, making it an ideal choice for multi-outlet water supply and irrigation systems.

Technical Specifications

Application	Residential, Light Commercial, Irrigation
Operation	Automatic
Power Source	Electric

Features

Key Components

- Pressure Tank
- Pressure Gauge
- Automatic Pressure Switch
- Integrated Handle
