

Residual Current Circuit Breaker

This residual current circuit breaker is designed to protect against electrical shock and fire hazards caused by earth leakage currents. It is suitable for residential, commercial, and industrial applications, featuring a compact design and easy installation.

Product Overview

Professional Electrical Protection

This Residual Current Circuit Breaker (RCCB) is engineered to provide comprehensive protection against electrical shock and fire hazards resulting from earth leakage. Designed for versatility, it is suitable for residential, commercial, and industrial electrical installations. The device ensures reliable safety performance while maintaining a compact, user-friendly profile for straightforward integration.

Electrical Specifications

Rated Current

63 A

Rated Current

Rated Voltage

240 V

Rated Residual Current

6.3 A

Compliance & Standards

International Standards

IEC 61008, GB CN16917

Safety & Features

Integrated Safety Features

- Manual test button for functionality verification
- Visual earth fault indicator
- Designed for earth leakage protection

Installation Details

Maintenance

Monthly test recommended to ensure proper tripping functionality
