

# Retractable Window and Door Awning

This retractable awning is designed to provide shelter and shade over windows or doorways. Its adjustable design allows for extension based on weather conditions.

## Product Overview

### Versatile Protection for Entryways

This retractable window and door awning provides effective shelter and shade, protecting your exterior spaces from sun and rain. Designed with a durable, transparent polycarbonate panel, it offers reliable performance while maintaining natural light. Its retractable mechanism allows for easy adjustment, making it a flexible solution for various weather conditions and architectural needs.
