

Reverse Osmosis Water Purification Machine

This water purification machine utilizes reverse osmosis (RO) technology to remove impurities and contaminants. It has a capacity of 22L/H and dimensions of 385*250*400mm.

Overview

Advanced Water Purification System

This high-performance reverse osmosis water purification system is engineered to provide a consistent supply of clean and safe drinking water by effectively removing impurities and contaminants. Featuring a sleek, modern design, the unit integrates seamlessly into modern kitchens while offering intuitive user controls. With advanced monitoring capabilities and user-friendly maintenance, it represents a reliable solution for maintaining optimal water quality.

Performance Metrics

Real-time Water Quality

24.5 mg/L

TDS Level
