

RG58 A/U Coaxial Cable

This is an RG58 A/U coaxial cable used in communication applications. It has a braided shield offering signal protection and a durable outer jacket.

Product Overview

RG58 A/U Coaxial Cable

This RG58 A/U coaxial cable is engineered for reliable signal transmission in various electronic and communication systems. Featuring a 50-ohm impedance and robust construction, it includes a tinned copper inner conductor and a braided shield to ensure optimal signal integrity. The durable PVC outer jacket provides necessary protection, making it a versatile solution for professional installation requirements.

Technical Specifications

| | |
|-----------------------|---------------------------|
| Impedance | 50 ohm |
| Inner Conductor | 19 x 0.18mm Tinned Copper |
| Dielectric Diameter | 3 mm |
| Dielectric Material | Solid PE |
| Braiding | 112 x 0.10 Tinned Copper |
| Outer Jacket Diameter | 5 mm |
| Jacket Material | PVC |

Logistics

Packaging Options

- 100m-1000m Roll
- Cardboard Spool
- Wooden Spool
