

# Rice Huller Rubber Roller

Rice huller rubber rollers are designed for efficient husk removal from rice grains. These durable rollers minimize grain breakage, maximizing yield during the milling process.

## ADDITIONAL IMAGES

## Product Overview

### Professional Rice Huller Rubber Roller

This high-performance rubber roller is precision-engineered for the effective hulling of paddy rice. Constructed with a durable NBR rubber surface and a robust cast iron drum, it is designed to maximize yield while minimizing grain breakage. Its durable material composition ensures excellent abrasion resistance and consistent hulling efficiency throughout the milling process.

## Technical Specifications

Outer Diameter	152 mm
Height	125 mm
Rubber Compound	NBR
Drum Construction	Cast Iron

## Features

### Performance Benefits

- Minimal grain breakage
- High abrasion resistance
- Consistent hulling efficiency
- Durable construction for long service life
