

Ride-On Concrete Power Trowel

This ride-on power trowel is designed for finishing large concrete slabs with precision. Its adjustable blades allow for customized finishing, while the comfortable seat and ergonomic controls ensure operator safety and ease of use.

Overview

Professional Concrete Finishing

The Ride-On Concrete Power Trowel is a heavy-duty machine engineered for efficiency and precision on large-scale concrete finishing projects. It features a robust, super heavy-duty gearbox and spider assembly designed to withstand grueling industrial conditions. With ergonomic operator controls and adjustable seating, this machine minimizes fatigue while maximizing productivity for commercial construction applications.

Key Features

Durability & Build

- Heavy duty gearbox for extended operational life
- Low maintenance drivetrain design
- Super heavy-duty spider assembly
- Robust frame construction

Operator Comfort

- Adjustable sliding seat with front-to-back positioning
- Foldable wheel controls for ergonomic blade pitch adjustment
- Conveniently located tool kit for quick access

Identification

Model Identifier	HP-TS80
Categories	Ride-On, Power Trowel, Concrete Finishing, Industrial
