Product Overview

High-Performance Network Connectivity

This Ethernet patch cord is engineered for reliable, high-speed network connections across home, office, and data center environments. Featuring universal RJ45 connectors on both ends, it ensures seamless compatibility with routers, switches, and computers. Built with durable materials and stranded copper conductors, this cable provides the flexibility and signal integrity required for professional networking applications.

Physical Construction

Conductor Material	Stranded copper
Connector Type	RJ45
Contact Plating	Gold-plated
Jacket Color	Black

Features

Key Features	Gold-plated contacts, Strain relief boots, Corrosion resistant, High-speed data transfer
--------------	--

Applications

Suitable Environments

- Home networking
- Office networks
- Data centers

Compatibility

Compatible Devices

Computers • Routers • Switches • Network devices
