

# Road Sweeper Vehicle

This road sweeper vehicle is designed for efficient street cleaning and maintenance. Equipped with rotating brushes and a powerful vacuum system, it effectively removes debris, dirt, and leaves from road surfaces.

## ADDITIONAL IMAGES

## Overview

### Professional Urban Sanitation Solution

This high-performance road sweeper is built on a reliable chassis, designed specifically for efficient municipal and industrial street maintenance. Featuring a powerful Euro 5 diesel engine and a versatile sweeping system, it offers exceptional debris collection and dust suppression capabilities. With its compact dimensions and high cleaning efficiency, it is an ideal choice for maintaining cleanliness in urban environments, residential zones, and industrial parks.

## Performance Metrics

### Cleaning Efficiency & Speed

**95 %**

Cleaning Efficiency

**90 km/h**

Max Speed

**67500 m2/h**

Avg Work Capacity

## Vehicle Chassis

### Basic Chassis Data

Attribute	Value
GVW	7300 kg
Wheelbase	3360 mm
Driving Type	4*2
Steering	LHD
<b>Tire Configuration</b>	<b>7.00R16 (Total 6 tires)</b>

## Engine & Powertrain

### Engine Specifications

- Horsepower: 98 hp
- Displacement: 2999ml
- Engine Type: 4-stroke, 4-cylinders, water cooling
- Emission Standard: Euro 5
- Gearbox: 5 forward and 1 reverse

## Sweeping System

### Tank Capacities

**6 m3**

Trash Tank

**1.5 m3**

Water Tank

### Sweeping Width

3 - 3.5 meters

### System Features

Four Brushes, Vacuum Suction, Dust Suppression Spraying
