Product Overview

Industrial Rotary Brush Roller

This industrial rotary brush roller is engineered for demanding sweeping, scrubbing, and surface finishing applications. Designed with a durable central core and dense, high-performance synthetic bristles, it provides consistent cleaning action for road sweepers and heavy-duty machinery. The brush is available in various configurations to ensure compatibility with diverse industrial cleaning equipment.

Technical Dimensions

Dimensional Parameters

Parameter	Description
D1	Whole diameter of the brush
D2	Diameter of the roller
D3	Diameter of the inner hole
L1	Length of the bristle
L2	Length of the brush

Bristle Specifications

- Customizable bristle material
- Customizable bristle diameter

Applications

Primary Applications

Road Sweeping, Industrial Scrubbing, Surface Polishing, Machinery Cleaning
