

Rotary Hand Pump for Drums

This heavy-duty rotary hand pump is designed for dispensing liquids from barrels and drums. It features a robust cast iron pump body with a corrosion-resistant finish and includes a telescoping suction tube to fit various drum depths.

Product Overview

Industrial Fluid Transfer Solution

This heavy-duty rotary hand pump is engineered for efficient liquid dispensing from standard barrels and drums. Featuring a robust cast iron body with a corrosion-resistant coating, it ensures long-term reliability in demanding industrial, agricultural, and automotive settings. The self-priming design provides a consistent flow, while the adjustable suction tube accommodates various container depths for maximum versatility.

Technical Specifications

Suitable Fluids

- Oils
- Solvents
- Non-corrosive liquids

Construction Material	Cast Iron
Finish	Corrosion-resistant
Design Features	Self-priming, Telescoping suction tube, Comfortable handle, Manual operation

Applications

Recommended Industries

Industrial • Agricultural • Automotive
