Product Overview

Robust Rotary Hoist Jib Crane Frame

This rotary hoist jib crane frame is engineered for efficient and secure light-duty lifting operations in industrial and construction environments. Featuring a 180-degree rotation angle and a load capacity of up to 600kg, it provides versatile positioning for various hoisting tasks. Its durable, reinforced design ensures long-lasting stability, making it an essential tool for professional maintenance and assembly applications.

Technical Specifications

Rated Loading Weight	600 kg
Maximum Arm Length	750 mm
Rotary Angle	180 degree

Compliance & Safety

Quality Standards	GS Certified, RoHS Compliant, TUV Approved
-------------------	--

Compatibility & Usage

Compatible Hoist Types

- Electric Rope Hoist
- 100-600kg load capacity hoists
