

Rotary Tiller for Soil Preparation

This product is for hard work and site preparation types of agricultural machinery, mainly for dry land, paddy field of rotary operation.

Product Overview

Professional Soil Preparation Solution

This diesel-powered rotary tiller is a robust agricultural tool designed for high-efficiency operation in dry lands and paddy fields. Featuring an all-gear drive system and ductile iron gearbox, the machine ensures exceptional durability and power transfer for demanding site preparation. Its compact, flexible structure makes it ideal for diverse environments, including orchards, vegetable farms, and tea plantations.

Technical Specifications

Performance Metrics

1350 mm

Max Tillage Width

100 mm

Tillage Depth

50 ha/h

Productivity

132 kg

Weight

Drive System

All-gear drive

Clutch System

Wet friction plate clutch

Operational Capabilities

Multi-functional Applications

- Pumping
- Power generation
- Spraying
- Trenching
- Earth moving
- Short-distance transport

Suitable Environments

Dry Land, Paddy Fields, Orchards, Vegetable Gardens, Tea Plantations, Tobacco Areas
