

Rotating Warning Light for Industrial Safety

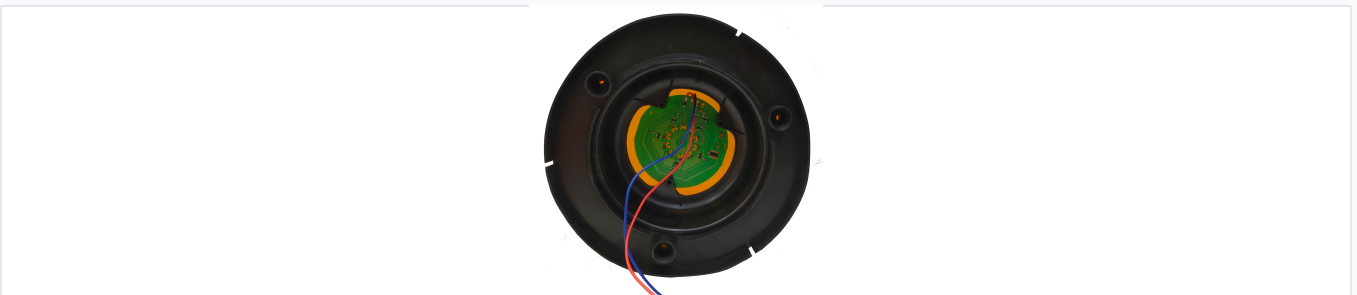

This rotating warning light is designed for industrial safety and traffic warning applications. It operates on either 12V or 24V DC power and features a durable PS cover with a rubber base.

ADDITIONAL IMAGES

Product Overview

Internal rotating mechanism designed for high visibility in industrial settings.

High-Visibility Industrial Warning Solution

This industrial-grade rotating warning light is engineered for demanding environments such as mining areas and construction sites. Designed for maximum visibility, it features a bright amber lens and a robust rotating mechanism to effectively alert personnel to potential hazards. Its dual-voltage compatibility and durable construction ensure reliable safety signaling in diverse industrial applications.

Technical Specifications

High-quality lens ensures clear visual signaling for safety applications.

Operating Voltage

12 V

DC Voltage

24 V

DC Voltage

Ingress Protection

IP56

Connection

Two wires

Material & Construction

Durable amber lens and rubber base construction suitable for harsh mining environments.

Materials

- PS (Polystyrene) Cover
- Rubber Base

Dimensions

Physical Dimensions

Dimension Type	Measurement
Height/Width Reference 1	220mm
Height/Width Reference 2	222mm
Total Clearance	240mm

Commercial Terms

Warranty	12 months
Payment Terms	30% Deposit by T/T before production, 70% before shipment
Trade Terms	FOB Shenzhen
Delivery Time	Within 30 days after deposit
