Product Overview

Keywords	Large round baler
Model	9YG-1.2
Bale size	Φ1300x1200 mm
Bale weight	200-400 kg
Pickup width	2100 mm
Feeding open	1200 mm
Roller speed	124 r/min
Roller number	16
Cutting device	16 blades
Bale method	net
Efficiency	≥9000 kg/h
Match power	≥100 HP
Overall size	4290x2830x2400 mm
Weight	3000 kg

Technical overview of the 9YG-1.2 round baler dimensions and specifications.

High-Efficiency Round Baler

The 9YG-1.2 model is a robust and efficient agricultural machine designed for professional hay and forage harvesting. It features a high-capacity pickup system and an advanced 16-blade cutting device to ensure consistent bale density. Engineered for medium to large-scale operations, this baler delivers reliable performance with a high output efficiency.
