

Round Bar Peeling Machine

This machine is designed for peeling round bars. It can also straighten wire, burnish wire rod, and straighten steel bars.

Overview

Industrial Round Bar Peeling Solution

This high-performance round bar peeling machine is designed for precision industrial applications. Engineered for efficiency and reliability, it provides advanced material processing capabilities suitable for demanding steel production environments. The equipment incorporates proven technological innovations to ensure world-class quality and consistent results for professional manufacturing operations.

Technical Specifications

Available Peeling Models

- BP-15
- BP-40
- BP-80
- BP-150

Available Straightening Models

- JP-15
- JP-50
- JP-80
- JP-150

Equipment Capabilities

Performance Standard

High-Precision • Industrial Grade

Machine Types

Peeling Machine, Centerless Machine, Straightening Machine
