

Rubber Adhesive for Conveyor Belt Repair

This high-performance adhesive bonds rubber, leather, metal, and ceramic materials. It is suitable for conveyor belt repair and various industrial applications due to its wear and impact resistance.

Product Overview

High-Performance Rubber Adhesive

This industrial-grade rubber adhesive is engineered for superior bonding strength, toughness, and wear resistance. Designed for versatility, it effectively bonds rubber, leather, metal, and ceramics, making it an ideal solution for conveyor belt repairs. The formula cures at room temperature and provides excellent electrical insulation, ensuring reliable performance in demanding environments.

Technical Specifications

Curing Method	Room temperature curing
Key Properties	Wear Resistant, Impact Resistant, High Bonding Strength, Electrical Insulation
Net Content	1 KG/KIT

Applications

Compatible Materials

- Conveyor Belts
- Rubber
- Leather
- Metal
- Ceramics
