

Rubber Block Cutter

This rotating-disc type cutting machine is designed for cutting natural, compound, reclaimed, and synthetic rubber. It cuts rubber blocks into smaller blocks, slices, granules, and bars, and can also process other materials.

Overview

Professional Rubber Block Cutter

This rotating-disc cutting machine is designed for efficient processing of natural, compound, reclaimed, and synthetic rubber blocks. It excels at transforming large rubber bales into manageable blocks, slices, granules, or bars. Engineered for industrial durability, it provides high-precision cutting to enhance production efficiency and minimize material waste.

Technical Specifications

Performance Metrics

50 r/min

Rotational Speed

5 Mpa

Working Pressure

Model Comparison

Specification	WQJ-1000	WQJ-1300
Blade Diameter	1000mm	1300mm
Power	4+2.2kw	4+2.2kw
Production Capacity	2t/h	3t/h

Features

Output Forms

- Blocks
- Slices
- Granules
- Bars

Suitable Materials

Natural Rubber, Compound Rubber, Reclaimed Rubber, Synthetic Rubber, Silica Gel, Nitrile Rubber
