

Rubber Pad Grout Trowel

This rubber float trowel is designed for applying and smoothing grout and plaster. It features a rectangular rubber pad attached to a plastic handle for even material distribution and a smooth finish.

Product Overview

Professional Rubber Float Trowel

The rubber float trowel is a precision hand tool engineered for the application and smoothing of grout, plaster, and various finishing materials. Featuring a durable rectangular rubber base, this tool ensures even material distribution while protecting the underlying surface from scratches or damage. Its ergonomic handle design prioritizes user comfort, effectively reducing fatigue during intensive tiling or renovation projects.
