

RV Electrical Hatch with Key Lock

This RV electrical hatch provides a weatherproof enclosure for electrical connections. It features a hinged door with a key lock for security and a small access port.

Product Overview

Durable RV Electrical Cable Hatch

This large cable hatch is specifically designed for secure 30/50A electrical cable management in recreational vehicles. Constructed from high-quality plastic, it offers excellent UV and impact resistance to withstand harsh outdoor environments. The unit features an integrated key lock for added security and a convenient access port, ensuring your electrical connections remain protected while in transit or parked.
