

S-FTP CAT6 Outdoor Double Jacket Cable

This S-FTP CAT6 cable features a double jacket for outdoor use. It is designed for high-performance data transmission, with individual foil shielding on each twisted pair to minimize interference and crosstalk.

Product Overview

Professional Outdoor Networking Solution

This S-FTP CAT6 cable is engineered specifically for demanding outdoor environments, featuring a robust double jacket construction to ensure longevity. The Shielded Foil Twisted Pair design effectively minimizes electromagnetic interference and crosstalk to maintain high signal integrity. It is an ideal choice for high-speed Gigabit Ethernet applications, security systems, and industrial networking projects requiring extreme durability against UV, moisture, and abrasion.

Technical Specifications

Cable Type	S-FTP (Shielded Foil Twisted Pair)
Category	CAT6
Jacket Construction	Double Jacket

Performance Metrics

Key Performance Indicators

1 Gbps

Ethernet Speed Support

Application & Features

Recommended Applications

- Outdoor Networking
- Security Camera Systems
- Industrial Applications
- Gigabit Ethernet Infrastructure

Environmental Resistance

UV Resistant, Moisture Protection, Abrasion Resistant
