

Sanding Belts for Wood Metal and Plastics

These sanding belts are designed for efficient material removal and surface finishing. They are suitable for use on wood, metal, and plastics.

Product Overview

High-Performance Abrasive Solutions

These premium sanding belts are engineered for professional-grade surface finishing and efficient material removal. Designed for versatility, they perform consistently across a wide range of surfaces including wood, metal, and plastics. With a robust backing construction and high-quality abrasive grains, these belts offer an extended service life and reliable results for demanding industrial or DIY applications.

Technical Specifications

Key Performance Attributes

- Robust backing construction
- High-quality abrasive grains
- Consistent material removal
- Extended operational life

Application Scope

Professional Use • DIY Applications

Suitable Materials

Wood, Metal, Plastics
