

Sausage Slicing Machine

This sausage slicer is a robust machine designed for slicing sausages and similar food products with precision. Constructed from stainless steel, it ensures durability, hygiene, and ease of cleaning for commercial food processing environments.

Overview

Professional Sausage Slicing Solution

This sausage slicing machine is engineered for precision and consistency in commercial food processing environments. Constructed from durable materials, it features a specialized feeding mechanism to ensure uniform slicing with every pass. Its compact footprint is optimized for butcher shops, delis, and food manufacturing facilities that require high throughput without sacrificing valuable counter space.

Technical Specifications

Key Performance Metrics

120 W

Motor Power

292 r/min

Blade Speed

45 mm

Max Blade Diameter

Rated Voltage 220V–240V

Rated Frequency 50 Hz

Slicing Thickness Range 5-30

Dimensions and Weight

Net Weight 7.1 kg

Physical Dimensions (L x W x H) 248 x 189 x 326 mm

Features

Safety and Build Stainless Steel Construction, Safety Interlock Mechanism, Compact Design, Uniform Feeding Tube
