

Scania Brake Drum

This brake drum is suitable for use in trucks, buses, and trailers. It provides optimal friction and wear resistance, contributing to an extended service life.

Product Overview

High-Performance Heavy-Duty Brake Drum

This heavy-duty brake drum is engineered for superior braking performance in demanding commercial vehicle operations. Constructed from premium gray iron and precision-machined using CNC technology, it ensures optimal friction characteristics and excellent heat dissipation. Designed for reliability and longevity, this component helps reduce downtime through exceptional wear resistance and a precise fit.

Technical Specifications

Material	Gray iron
Manufacturing Process	CNC Machining

Compatibility

Supported Vehicle Makes	Benz, BPW, DAF, Fruehauf, HINO, Inveco, Tatra T815, Ford, Nissan, Mitsubishi, Scania, SAF, Toyota, Webb, Volvo, MTZ
-------------------------	---

Logistics and Services

Production Lead Times

20 days

Mould Creation

7 days

Sample Production

20 days

Mass Production

Key Advantages

- High quality control standards
- Prompt delivery schedules
- Competitive pricing
- Small order flexibility
- Customization support via drawings or samples
