

SCM Series Centrifugal Water Pump

The SCM series centrifugal pump is designed for efficient fluid transfer. It features robust construction for durability and is suitable for clean water and non-aggressive liquids.

Product Overview

SCM Series Centrifugal Water Pump

The SCM series centrifugal water pump is engineered for efficient fluid transfer in diverse environments. Built with a robust cast iron housing and corrosion-resistant components, it ensures long-lasting reliability for both industrial and domestic use. The compact design allows for simplified installation, while the high-efficiency motor provides consistent performance across various flow and pressure requirements.

Technical Construction

Housing Material	Cast Iron
Impeller Material	High-quality engineered materials
Corrosion Resistance	Yes

Applications

Primary Applications	Domestic Water Supply, Agricultural Irrigation, Industrial Fluid Transfer
----------------------	---

Fluid Compatibility

Supported Liquids

- Clean water
- Non-aggressive liquids

Performance

Efficiency and Power

1 High
Efficiency Class
