

Scraper Blades Cutting Edges End Bits

These scraper blades, cutting edges, and end bits are replacement parts for earthmoving machinery. Manufactured from hardened steel, these components offer exceptional wear resistance and are suitable for various scraper models.

Product Overview

Heavy-Duty Scraper Components

These replacement scraper blades, cutting edges, and end bits are engineered for demanding earthmoving and construction environments. Manufactured from high-grade hardened steel, these components are designed to deliver superior wear resistance and extended service life. Each part ensures a precise fit for a wide range of scraper models, maintaining optimal performance and reliability in the field.

Compatibility

Compatible Equipment

Scraper, Excavator, Loader, Bulldozer, Motor Grader, Electric Shovel

Product Range

Available Components

- Scraper Blades
- Cutting Edges
- End Bits
- Tooth Tips
- Tooth Adapters
- Wear Caps
- Lip Shrouds
- Heel Shrouds
- Kwiklok Liners
- Ripper Tooth Shanks
- Side Cutters

Technical Specifications

Material Grade

Hardened Steel • High Wear Resistance
