

Screened Pipeline Centrifugal Pump

This screened pipeline centrifugal pump is designed for efficient and reliable fluid transfer. The integrated screen prevents large particles from entering the pump, ensuring smooth operation and reducing the risk of clogging.

Product Overview

Robust Industrial Pumping Solution

The Screened Pipeline Centrifugal Pump is engineered for reliable and efficient fluid transfer across demanding industrial environments. Featuring a durable stainless steel casing and a cast iron base, this pump offers excellent corrosion resistance and long-term performance. Its inline design simplifies installation, while the integrated inlet screen protects the impeller by filtering out debris, ensuring smooth operation and reduced maintenance.

Construction & Design

Key Design Features

Inline Pipeline Design • Integrated Inlet Screen • Compact Footprint • Corrosion Resistant

Casing Material	Stainless Steel
Base Material	Cast Iron

Performance & Application

Primary Applications

- Water Treatment Plants
- HVAC Systems
- Process Industries
- Water Transfer & Circulation

Compatible Fluids	Water, Chemicals, Oils
