

Screw Tap Re-Sharpener

This machine efficiently re-sharpens three-edge and four-edge wire taps. It is a portable and simple solution for grinding the front cutting surface and edge.

Product Overview

Precision Tap Re-sharpening

The screw tap re-sharpener is a specialized, portable machine designed to restore cutting efficiency to industrial taps. It enables the accurate grinding of the front cutting surface and edges of both three-edge and four-edge taps. This tool is essential for extending the lifespan of threading tools and maintaining optimal performance in professional machine shops and tool rooms.

Technical Specifications

Grinding Features

- Front cutting surface grinding
- Front cutting edge grinding

Supported Tap Types

3-Edge Taps, 4-Edge Taps

Key Features

Operational Efficiency

2 types

Supported Tap Edge Variations

Key Benefits

Portable • Easy-to-Use • High Precision
