

Sealed VRLA Storage Battery

This sealed VRLA storage battery is designed for various applications. It provides long service life and excellent discharge characteristics, ideal for UPS systems and emergency lighting.

Product Overview

Slenderness Series (F) Sealed VRLA Battery

The Slenderness Series F is a high-performance Sealed Valve-Regulated Lead-Acid (VRLA) battery engineered for reliable standby power. Featuring a space-efficient, slender form factor, this maintenance-free unit is specifically designed for critical applications including UPS systems and emergency lighting. It delivers excellent discharge characteristics and a long service life, ensuring consistent operation in professional environments.
