Product Overview

Professional Tensile Testing Solution

This Seam Tension Test Clamp is engineered specifically for testing the integrity of seams in stuffed toys and beanbag-type products. It features a robust design that ensures secure gripping of materials on both sides of a seam during standardized tension testing procedures. The clamp is equipped with essential 19mm diameter washers to meet safety testing requirements for juvenile products.

Technical Specifications

Washer Diameter	19 mm
Primary Applications	Stuffed Toys, Beanbag Toys, Seam Strength Testing, Quality Control

Design Features

Key Features

- Serrated jaws for enhanced material grip
- Adjustable screw for controlled clamping pressure
- Quick-release lever for efficient testing cycles
- Durable metal construction for high-demand environments
