

Selection of Tower, Round, Cylindrical, and Backlighting LEDs

This selection includes 2mm tower LEDs, 3mm round LEDs, cylindrical LEDs and backlighting LEDs. These LEDs come in different sizes, shapes, and functionalities to suit diverse electronic applications.

Product Overview

Comprehensive LED Selection Guide

This diverse range of light-emitting diodes offers solutions for various electronic assembly requirements, spanning tower, round, cylindrical, and backlighting configurations. Available in multiple sizes including 2mm, 3mm, 3.75mm, 4mm, and 2.5x5.0mm formats, these components are designed for versatility in circuit design. The selection includes specialized options such as high-intensity, low-current, bi-color, and integrated resistor variants to streamline your engineering projects.

Available LED Formats

Diameter/Dimension Sizes

- 2mm
- 3mm
- 3.75mm
- 4mm
- 5mm
- 2.5 x 5.0mm

Types and Shapes

Tower Type, Round, Cylindrical, Backlighting, Right Angle, Bi-Color

Performance Features

Performance Options

Economical • Standard • High Efficiency • Low Current • High Intensity

Technical Specifications

Technical Variations

Feature Type	Description
Supply Voltage	Models available with integrated 5V resistors
Color Output	Single and Bi-Color/Multi-color options
Mounting	Flangeless, Small Flange, and Stand-Off variants
