

Selection of Water, Oil, and Pressure Pumps

These pumps are suitable for water drainage, irrigation, oil transfer, spraying, and high-pressure cleaning. The selection includes submersible water pumps, jet pumps, automatic shut-off power sprayers, oil pumps, 12-volt diaphragm pumps, and high-pressure machines.

Product Overview

Comprehensive Pumping Solutions

This versatile collection of industrial and commercial pumps is designed to handle a diverse range of fluid transfer and pressure applications. From submersible water pumps for drainage and irrigation to oil transfer systems and high-pressure cleaning machines, these units offer reliable performance for professional environments. The lineup includes advanced features like automatic shut-off mechanisms and 12-volt configurations, ensuring compatibility with varied operational requirements.

Product Range

Types Included

- Submersible Water Pumps
- Jet Pumps
- Automatic Shut-Off Power Sprayers
- Oil Transfer Pumps
- 12V Diaphragm Pumps
- High-Pressure Cleaning Machines

Applications

Primary Applications

Water Drainage, Agricultural Irrigation, Oil Transfer, Chemical Spraying, High-Pressure Cleaning

Key Features

Performance Features

Automatic Shut-Off • 12V Operation • Submersible Design • High Pressure Output
