

Self-Closing Cable Wrap

The JDD-SCS self-closing wrap is woven from polyester yarns, creating a non-expandable sleeving. Its split open design allows for easy installation on assembled cable harnesses, offering durable protection for wire harnesses in various applications.

Product Overview

Professional Cable Protection

The JDD-SCS self-closing wrap offers a high-performance solution for cable management in demanding environments. Woven from a blend of monofilament and multifilament polyester yarns, this sleeve provides exceptional abrasion resistance while remaining lightweight and cost-effective. Its innovative split-open design facilitates rapid, tool-free installation even on pre-assembled cable harnesses.

Technical Specifications

Material Composition

- Monofilament polyester (weft)
- Multifilament polyester (warp)

Performance Metrics

1 High

Abrasion Resistance

Design Features

Self-closing, Split open design, Non-expandable

Applications

Primary Applications

- Automotive wire harnesses
- Telecom cable assemblies
- Automatic equipment cabling
- Railway infrastructure
- Electrical panel boards
