

# Self-Drilling Anchor Bolt Plate for Mine Roof Support

Self-drilling anchor bolt combines drilling, grouting, and anchoring. It ensures anchoring in complex ground conditions for safe, reliable, and efficient mining operations.

## Product Overview

### High-Performance Mine Roof Support

These bearing plates are engineered from forged steel to provide critical support in underground mining operations. Featuring a center hole design, they allow for seven degrees of articulation in all directions, ensuring effective load distribution. Each component is rigorously tested to meet high safety standards for roof stabilization.

## Technical Specifications

Material Grade	Q235
Articulation Capability	7 degrees

## Dimensions and Load Capacity

### Anchor Plate Dimensions

Type	Size (mm)	Thickness (mm)	Hole Diameter (mm)	Weight (kg/pcs)
R25N	150*150	8	30	1.4
R32L	200*200	10	35	3.2
R32N	200*200	10	35	3.2
R32S	200*200	12	35	3.5
R38N/21	200*200	12	41	3.7
R38N/19	200*200	12	41	3.7
R51L	200*200	30	60	9.1
R51N	250*250	40	60	18.9
T76N	250*250	40	80	19.6
T76S	250*250	40	80	19.6
