

Self-Priming Centrifugal Diesel Water Pump

This self-priming centrifugal pump is designed for various water transfer applications. It features a robust diesel engine for reliable power and efficient operation.

Product Overview

High-Performance Diesel Water Pump

This self-priming centrifugal diesel water pump is engineered for demanding water transfer applications in industrial, construction, and agricultural settings. Built with a robust diesel engine and durable construction materials, it provides reliable power and consistent flow rates. Its compact design and sturdy frame ensure portability and easy deployment in various field environments.

Technical Specifications

Pump Type	Self-Priming Centrifugal
Power Source	Diesel Engine
Suitable Applications	Irrigation, Construction, Industrial Water Transfer

Design Features

Key Design Features

- Self-priming capability
- Durable construction for harsh environments
- Compact and portable frame
- High flow rate delivery
